

# TRUFOLD

## Trufold Products is your NZ specialist in **SHEET METAL FLASHING FABRICATION**

with extensive industry experience.

Constructed in our Tauranga workshop with precision detail, our dedicated team of sheet metal fabricators make-to-order for architects, building contractors and joiners.

Utilising top-of-the-range technology, our 8m slitter folder and 6m guillotine can cut and fold aluminium from 1mm to 3mm thick. We have the ability to fold 2mm ali in 6m lengths!

The process is easy, simply, send in your drawings, and our team will manufacture and dispatch your flashings with a fast turnaround. If you require an urgent order, just let us know, and we'll pull out all the stops to meet your deadline.

In the near future we hope to utilise a new phone application that will enable you to draw your flashings on your phone/device and send them directly to our folding software to speed up the ordering process.
